DETAILED OFFICE ACTION

Faxing of Responses to Office Actions

In order to reduce pendency and avoid potential delays, TC 3700 is encouraging FAXing or responses to Office Actions directly into the Group at (571) 273-8300. This practice may be used for filing papers, which require a fee by applicants who authorize charges to a PTO deposit account. Please identify the examiner and art unit at the top of your cover sheet. Papers submitted via FAX into TC 3700 will be promptly forwarded to the examiner.

1. Claims 1, 14, and 21 have been amended for further examination. Claims 2, 23, and 24 have been canceled.

Allowable Subject Matter

2. Claims 1, 3-22, and 25-34 are allowed.

The following is a statement of reasons for the indication of allowable subject matter: No prior art of record discloses a booklet maker, a method of making booklets, and a system for

making booklets comprising a reciprocating pivotable collecting device which includes two supporting sides formed with a saddle shape at a first edge, a connector between the sides at a second edge to enclose a volume; a reciprocating transferring device including a displaceable clamping component, wherein the transferring device reciprocates along a non-linear path to deliver a folded sheet material to the collecting device; the collecting device pivots to receive the folded sheet material such that different portions of the folded sheet are supported by different sides; and wherein the pivotable collecting device reciprocatingly pivots about an axis positioned between the supporting sides and passing through the volume; a collecting drive for clamping a portion of the folded sheet material against the collecting device and for advancing the portion along side of the collecting device; and including all of the other limitations of the independent claims.

Weber is the closest reference to disclose a booklet maker. However, Weber does not disclose a booklet maker comprising a reciprocating pivotable collecting device consisting of two supporting sides, and a bottom, wherein the pivoting axis is positioned between the two supporting sides and passing through an enclosed volume.

Prior Art

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Trovinger ('151), Trovinger ('436) and Meier disclose similar collecting devices.
